

Digital Printing Portfolio

Primera Water-based Inkjet

Fasson® product constructions shown have been evaluated by Avery Dennison on different water-based Inkjet platforms and are recommended based upon the existing printer ink system utilized at the time of testing. Additional product constructions are available.

These products are available through our EXACT™ and Ready Width™ service programs. The 1-slit roll minimum and next-day shipment are a great complement to the short run/quick turn capabilities of digital presses. Please contact your Avery Dennison sales representative for assistance.

- Recommended: Indicates these substrates meet Avery Dennison proprietary print testing standards. To earn our recommendation, a specification must have average or better print quality, readability, image traits and durability.
- Indicates substrates meet Avery Dennison print testing standards but may require further customer-specific testing in order to confirm their appropriateness for an application.
- Not Recommended: Indicates one or more of the characteristics failed the graded characteristics within the Avery Dennison test standards.

NOTE: As label graphics and performance requirements vary, we encourage end use application testing of all materials prior to use.

*Approved for BS 5609 Section 3 when printed with Primera pigment inks.
